Ariba Catalog
Naming Convention

What is a Catalog(ue) Naming Convention?

A catalog naming convention is the name structure of your catalog when loaded into the Ariba Network.

Correct naming conventions (or subscription name) are required when auto sync is active in Ariba Cloud.

Our system naming conventions are:-

Supplier name + Underscore + _ + Country code

Example:

ABC INC_US

Where a <u>punchout</u> catalog is in place, the naming convention would be

ABC INC PUNCHOUT_US

If you have both a cif and punchout catalog in place, they would look like this

ABC INC_US

ABC INC PUNCHOUT_US

Please ensure your naming convention is correct.

Catalog Subscription Name Country Codes

Country	Country Code
Australia	AU
Belgium	BE
Brazil	BR
Canada	CA
China	CN
Germany	DE
Japan	JP
Korea	KR

Country	Country Code
Mexico	MX
