SPSC Code

- ✓ Also known as UNSPSC code – Universal Standard Products and Services Classification. This number is used to categorise your items in Ariba Cloud, if assistance is required speak to the Cummins Sourcing Manager.

Unit Price

- ✓ This is the Cummins specific negotiated price for a product, the price is limited to 3 decimal places to the right. It cannot include symbols or commas.
- ✓ Data Type : Double Integer

CIF Catalog Creation

Ariba Cloud

Unit of Measure

- ✓ Designed to capture the marketed units by which an item will be delivered when purchased. This must be the ISO compliant code. Cummins use UN/CEFACT UOMs which are stored on Cummins public site supplier.cummins.com > Standards and Processes > Supplier Catalogs > Indirect
- ✓ Data Type - Integer
- ✓ Maximum length 40 characters

Lead time

- ✓ Number of days estimated for delivery. Calendar days from the suppliers receipt of the order to the delivery of the goods or services to the buyer. If you do not have established lead times for your products – use 10.
- ✓ Data Type – Integer

Maximum Length 40 characters

Unit of Measure	Lead Time
EA	10
EA	5
EA	8
EA	5
EA	70

Optional Fields

Manufacturer Part ID

- ✓ If available

Manufacturer Name

- ✓ The name of the Original Equipment Manufacturer or your company that provides the item o Data Type: String
- ✓ Maximum length 80 characters

Supplier URL

- ✓ The Atmus system can display product images if you provide a URL for them. We cannot store image files within our system. Provide the static and direct URL for the item within this field.
- ✓ **Note:** Item images are not mandatory but when added provide better visibility to Cummins users.
- ✓ Data Type: String
- ✓ Maximum length 240 characters

Manufacturer URL

- ✓ If available

Market Price

- ✓ Not required

Supplier Part Auxiliary ID

- ✓ Not required

Short Name

- ✓ Not required

CIF Catalog Creation

Ariba Cloud

Expiration Date

- ✓ This is an optional field. Be aware that the items will not be visible to the users after the expiration date. To prevent this, be sure to update the expiration date before it expires.

Effective Date

- ✓ This is an optional field. Date should reflect the date the price was effective, and therefore should only change if the price has changed.

Parametric Data

- ✓ Not Required

Parametric Name

- ✓ Not Required

Loading File in ASN

Save your file using the .xls extension and load it into the Ariba Network.

If you have a large file, you can convert it to a CIF before loading to allow for more data (QRG titled "Converting a file to CIF format")

When loading the catalog always use the standard catalog name convention each time. Standard name is Supplier Name, Underscore, Country Code

- ✓ Example: ABC PUNCHOUT_US
- ✓ Example: ABC Supplier_US
- ✓ Example: Test Company_UK
